

THE EMPRESS EXPRESS

VOLUME XVII. NO. 5

EMPRESS, ALTA. THURSDAY, July 4, 1929

Price: \$2.00 Per Year.

United Church

The Church School, 10:30 a.m.
Public Worship, 11:30 a.m.
This Sunday's service will be a service of Thanksgiving to God that our King has recovered from his recent serious illness.

Special music will be rendered by the choir.

Wainfleet, 1:45 p.m.

Leland, 3:30 p.m.

Social Plains, 7:30 p.m.

We invite you to come and worship God with us.

Rev. Geo. A. Shields,
Minister.

Big Catch of Whitefish

Ottawa, June 29.—Whitefish were worth more than a million and a quarter dollars to the people of the Prairie Provinces and the Yukon Territory in 1928. The catch of whitefish in this area during the year, 12,112,100 pounds, was slightly less than in 1927, a Fisheries Branch statement says, but it had a market value of \$1,269,089 or nearly 25,000 more than in the preceding year. Taking the Prairie Provinces and the Yukon as a whole, the whitefish is first in importance among the fishes.

Town Well Being Repaired

The town well is undergoing repairs this week, a part of the piping to be renewed. Mr. McGhee, of Acadia Valley, is doing the work.

The Empress BAKERY

Get Your Bread, Cakes
and Pastry from us.

Town Deliveries made if required.

MURRAY
The BakerFourth Fortnightly
Crop Report

Issued by Department of Agriculture, Government of Alberta, Edmonton, June 29, 1929

Crop conditions through the central part of the province have considerably improved by rains during the past week and in southern and northern sections there is satisfactory promise of a good crop, according to telegraphic reports received on Friday by the Department of Agriculture for the fourth crop report of the season.

The prolonged drought during the latter part of May and the first three weeks of June has considerably reduced the prospective yield over the area comprising the central part of the province and in a few localities early sown wheat has been pastured or plowed down. Later sown crops, however, on breaking or summerfall have been able to weather the dry period, and as a result of the recent rains will grow a fairly good yield.

The southern part of the province has received sufficient rainfall to promote continued growth. An exceptional good stand of fall wheat is reported and spring wheat and the coarse grains are coming along well. The first irrigation the season has been completed and a start will be made with the cutting of the first crop of alfalfa during the coming week.

Slight injury to crops and gardens is reported in a few localities as the result of frosts on June 10th and 23rd. With the exception of a few limited areas, insect injury has been very slight.

The Peace River district continues to show promise of a very satisfactory crop, although some localities will require further rains shortly.

Pastures are making better growth and the feed situation has been considerably improved by the past week's rains, and as a result dairy production will show an increase in many sections of the province.

TENNIS

Empress At Acadia Valley

The tournament of mixed tennis club is progressing slowly. Mr. Action and Miss Gillies are the only pair to reach the fours. Those still in the eight's are: E. Schofield and Mrs. McCune; Rev. Shielde and Roy Torrance; S. McPherson and Miss Brown; H. Boyd and Mrs. Shields; Dr. McNeil and Mrs. Bassarab; Dr. Dowler and Mrs. Acton.

Players are urged to co-operate in getting games played off as soon as possible. A men and ladies' tournament will be commenced in the very near future.

The Empress Players journeyed to Acadia Valley on Thursday last and presented, "Two Days To Marry." There was a fair attendance. A dance was held after the play.

Old Age Pensions

Board Operating

Applications will now be received from those eligible for assistance under the terms of the Old Age Pensions Act, it is announced by Alex Ross, Chairman of the Board. Application forms are available for all persons desiring to apply for pensions and arrangements have been made by the Board whereby applicants will be enabled to do so with the least possible difficulty.

Applicants residing in Calgary and Edmonton are asked to call at the Workmen's Compensation Board office in these cities. In rural districts applications will be received by the secretary-treasurer of municipalities and in the cities of Medicine Hat, Lethbridge, Wetaskiwin and Red Deer.

Deer ripulations will be dealt with at the civic offices. In unorganized districts application forms may be secured from the office of the nearest detachment of the Alberta Provincial Police.

Cream Prices
Paid By Creameries

The following prices were reported paid by creameries during the week ending June 22, 1929, and at the points shown, according to figures compiled by the Dairy Branch of the Department of Agriculture:

Special No. 1	No. Off	Grade
Strathmore	34c.	32c.

Others 33c. 31c. 28c. 26c.

R. C. Morrison returned to town this week.

Local Druggist Weds

The marriage was solemnized at the Anglican Church, Medicine Hat, of Miss Helen R. Fisher, daughter of Dr. and Mrs. E. B. Fisher to Mr. William Stothers. The ceremony was performed by the Rev. Canon Western, on Wednesday, July 3, at 8 p.m. The bridegroom was Miss Con. Fisher, and best man, Mr. Norris P. Storey. Ushers were, H. McBain and J. Carol. The ceremony was informal and many friends from Empress were present. The happy couple amid the good wishes of their many friends, left on a honeymoon trip to Vancouver and Victoria before returning to Empress where they will make their future home.

"The Patsy"

The family should see "The Patsy" in a body, so we can judge price and size punch size. The story is replete with natural comedy. Afterwards they can all go home and live happier and funnier ever after.

Mariion Davies as Patricia, the snub-nosed Cinderella of the Harrington family, wins, of course first laurels, with the cleverest and most humorous characterization of the season. Dominated by her pompous mother and her shrewish elder sister, her life is just one suppressed desire after another.

P. Harrington tries to help, but Ma has had him buffaloes out of married life that left at the post, boy starts. Pat is having a hopeless love for Tony who is courtship. Grace, the older sister. When Grace gives him the air for a richer avarian, Tony stoops to giving Pat impersonal advice as to how to win the man she loves. How Pat acts on this advice to lure Tony within the net of matrimony makes the story the best laugh of several blue moons.

There are a number of good towns coming into existence along the Bow River at Kananaskis and Horseshoe Falls, will give a total hydroelectric development of 68,000 horse power. Calgary Power Company officials state the Ghost River plant will supply 36,000 horse power from the two units to be initially installed.

Charlie Rowles who has been attending school at Cabri, arrived home on Saturday.

7:30 p.m., Evensong and Sermon.

Pickerel Are Plentiful

Ottawa, June 29.—Pickerel fishermen had a busy time of it on Lesser Slave Lake in Alberta in May. The pickerel were coming in so fast on this northern water, 150 miles or so northwest of Edmonton, that the fish plants could scarcely handle them. Unfortunately however, according to Fishery Overseer W. H. Bamister's report from the Fisheries Branch from Faust, Alberta, word came that the market had been flooded and could not absorb more shipments for the time being so the fishermen reluctantly pulled in their nets.

Good Prices Paid

For Northern Lands

Prices at \$20 per acre were paid for the lands comprising the Indian Reserve adjoining the towns of Berwyn and Fairview disposed of on Saturday last by the Department of Indian Affairs. The highest price paid was \$40, per acre, paid by a Saskatchewan buyer.

Wide spread interest had been shown in this sale and a number of parcels were secured by buyers from various parts of the United States and Canada.

"Pat" Partridge, local pitcher for the Empress ball team, left on this morning's passenger train for home. He pitched his last game for the season, last night, when Bindloss met the Empresses, at Empress for the purpose of closing our ball season. The local team were composed mostly of a pick-up side. Bindloss won the game with a one-sided score.

Science To Rescue Agriculture

Recent developments in the realm of agriculture indicate that science is hastening to the aid of the farmer in Western Canada and that the time is not far distant when only those farmers who make an earnest study of the task will survive and prosper. The scientific advice and counsel now made by technical experts can hope to forge ahead and secure for themselves and their families the comforts which fall to the successful business man.

There are several major problems confronting the man upon the land in the West at the present time. Among these are the question of reducing the cost of the production of cash crops, and the necessity of not only fighting, but of forestalling reduction in yields through the agency of weeds, insect pests and diseases.

High costs of production and reduced yields through weeds, insects and diseases are problems which can only be beaten by the alert farmer. Only the farmer who calls to his aid the forces of science can hope to overcome this profit-robbing alliance.

Consider, for instance, the cost of producing a bushel of wheat. While accurate figures are difficult to secure it is definitely known that some farms are able to produce a bushel of wheat for 25 cents per bushel. In addition, it is more than likely that the acre which it has cost some of these neighbors to raise and harvest a similar bushel of wheat. It is a safe prediction that the cheap-production farmer has carefully studied the economic effects of the use of good seed, scientifically sound cultivation methods and the cheapest and best modes of growing his crop. He has done his work well and he has kept some of the profits of his venture, thus enabling him to find out the weak spots and remedy them.

In this field of agricultural effort a great deal of pioneering work has been done by the farm implement companies, individual farmers of an inventive turn of mind, and leaders of agricultural engineering. It only remains for the man to whom a majority of the work has already been done in this direction and to fully and thoroughly fit it to specific conditions and circumstances. Many are already doing so to their profit.

Then there is the problem of reducing the loss to profits through the prevalence of weeds which are annually taking a huge toll from farmers. Here, again, a good deal of research work can be done by the various departments of the College of Agriculture, the Provincial Government and the Federal Department of Agriculture. It has been demonstrated beyond all doubt that methods can be adopted which will keep these within control in some case, and in others that they can be entirely eradicated.

The next illustration of what is being done, investigations conducted by the Saskatchewan Department of Agriculture last year, as to whether or not the eradication of some of the most serious weeds by the use of chemicals might be cited. It is true that the tests showed that the cost of chemicals as a weed destruction agency on a large scale, may be uneconomical but the very small changes in the use of methods of application of these chemicals, from which the farm was clearly proved, combination of chemicals, suitable cultivation methods, the use of clean and pure seed, will go a long way towards reducing the losses occasioned by these weeds in this province.

Similar research work has been, and is being, carried on in the fight against disease attacking wheat and other cereal grain crops. It is also necessary to point out one of these diseases, the bunt, which is a disease of wheat that is so destructive to the variegates of rust but that also contains those milling and baking attributes which makes Canadian hard red spring wheat so desirable in the export market. Recent reports indicate that success in this field of endeavor is crowning the efforts of technical workers, and it is only a matter of two or three years before the farmers will be able to sow their fields with a rust-resistant wheat of good milling and baking quality.

The foregoing are only one or two illustrations of the manner in which science is being enlisted to aid the farmer and to be successful in this day and generation. It is essential that the agriculturist inform himself of what is being done in his behalf and apply the results of the work of those trained men to his own particular problems.

Imperial Airways Plan Luxurious Liners

Change In Construction Places Body Beneath Both Wings

Progress of commercial flying is shown in the order placed by Imperial Airways for a fleet of 100 aircrafts, including 100 passengers. Accommodation specified is for forty passengers in two saloons eight feet high with an enormous fuselage. The seats will be arranged four abreast, with a gangway between the saloons. In a private cabin, similar to those on Pullman cars, will be arranged for parties of two or four. In addition there will be a bar where refreshments can be served en route. Four

engines, on each wing, on either side of the fuselage, will drive the propellers. The wings will have three engine sets if necessary, also a reserve safety set. Silos will be fitted.

One of the big changes in construction is that the body of the craft is situated beneath wings, instead of between them. This helps to prevent noise in the cabins and also gives the passengers a clear view.

All-Canadian Highway

Will Go Through Most Spectacular Scenery In World

Before the end of the year it may be possible for one to drive from Winnipeg to Vancouver on all weather highways without detours to the United States pavements. Gravelled roads from the prairie west to Golden, B.C., feed the British Columbia and federal governments are now building around the "big bend" of the Columbia river to join the existing road down the coast to Vancouver. This highway when completed will pass from Winnipeg to Pacific tide water will go through some of the most interesting country and the most spectacular scenery in the world.

It then remains to bridge or tunnel Lake Superior.

Authorized Court Action

Persons charged under the Criminal Code in Yukon territory with an offence of "wilfully, at the creation of the ministerial service, trifled before a court in northwest territories." This authorization was given in a bill passed by the House,

Feeling Immigrants

Seeing Seems To Be Vetting Away From Coaxing People To Come To Canada

Three members of parliament, a Liberal, a Conservative, and a United Farmer, spoke the other day against compelling a heavy expense tax to induce immigrants to Canada. They represent farming districts in Alberta, Ontario and Quebec. Their reason is that the view they express is that young grain and fruit farmers are rapidly among townpeople. The adaptability of "coaxing" people to come to Canada is the point at issue.

There is no room in Canada for more people of course, but there are many spaces in other countries, particularly in the United States. Sending agents abroad to invite people to come to Canada brings a response; but the cost involved, though perhaps more would come if we stopped inviting them. There never were so many people wanting to get into the United States as since the "quota" law was passed. The close rates arc curiously as to what lies beyond it—Edmonton Bulletin.

There are several major problems confronting the man upon the land in the West at the present time. Among these are the question of reducing the cost of the production of cash crops, and the necessity of not only fighting, but of forestalling reduction in yields through the agency of weeds, insect pests and diseases.

High costs of production and reduced yields through weeds, insects and diseases are problems which can only be beaten by the alert farmer. Only the farmer who calls to his aid the forces of science can hope to overcome this profit-robbing alliance.

Consider, for instance, the cost of producing a bushel of wheat. While accurate figures are difficult to secure it is definitely known that some farms are able to produce a bushel of wheat for 25 cents per bushel. In addition, it is more than likely that the acre which it has cost some of these neighbors to raise and harvest a similar bushel of wheat. It is a safe prediction that the cheap-production farmer has carefully studied the economic effects of the use of good seed, scientifically sound cultivation methods and the cheapest and best modes of growing his crop. He has done his work well and he has kept some of the profits of his venture, thus enabling him to find out the weak spots and remedy them.

In this field of agricultural effort a great deal of pioneering work has been done by the farm implement companies, individual farmers of an inventive turn of mind, and leaders of agricultural engineering. It only remains for the man to whom a majority of the work has already been done in this direction and to fully and thoroughly fit it to specific conditions and circumstances. Many are already doing so to their profit.

Then there is the problem of reducing the loss to profits through the prevalence of weeds which are annually taking a huge toll from farmers. Here, again, a good deal of research work can be done by the various departments of the College of Agriculture, the Provincial Government and the Federal Department of Agriculture. It has been demonstrated beyond all doubt that methods can be adopted which will keep these within control in some case, and in others that they can be entirely eradicated.

It is essential that the agriculturist inform himself of what is being done in his behalf and apply the results of the work of those trained men to his own particular problems.

Russia Has Aero-Sleighs

Fitted With Airplane Propellers They Attain High Speed

Aero-sleights, driven at 35 to 45 miles an hour, will be used in Russia this winter. They recently travelled 2,400 miles from Moscow to Perm and back. Four sleights took part in the complete run and five more accompanied them on the first day's journey.

The average speed of a team of six horses is 12 miles an hour.

The new sleights are of unique

modern design and look except for the propeller, like an ordinary car mounted on runners. Under good conditions a speed of around 50 miles an hour can be attained.

Milner's Worm Powders are complete in themselves. They not only drive worms from the system but also help to restore the appetite and so invigorate the constitution that it speedily recovers from the result of the work of these parasitic intruders. They do their work thoroughly and soundness follows their use.

Developing Vancouver Port

Before the development of the port at the port of Vancouver, B.C., it was necessary to bring in all the materials required for the building of the port. The port can now be built with the help of the American porters. Mr. McNaughton also secured a fine cow, in line with his record of building up one of the finest show herds in the country.

Full lists of the champion bulls, Aggie Sylva Third, went to the Detroit Creameries for \$3,000. These two animals comprised the all-American progeny of Dan last year.

The average cost per head of the 60 cattle was \$355. A number of the animals went for round \$1,000 a piece.

A year-old bull went to an American buyer for \$2,000 and a fine all-American steer for \$1,500.

Mr. McNaughton also secured a fine cow, in line with his record of

building up one of the greatest

herds in the country.

It is contended that the product is fireproof on account of the pressure to which it is subjected and that it possesses insulating qualities to a high degree.

For Farm Ranch

A Mr. Morris, from Marion, North Dakota, has been in receipt of the new Fish Lake, Man., 18 miles west of Wawota, to be used as a

farming ranch, for foxes, mink,

skunks, and raccoons, the breeding stock to come from the States.

Evidently Less

Speaker (after forty minutes of the usual talk!) And so to 20 I faced the world with 50 cents and a clear conscience?

Very bold voice from the rear

of the room—And what happened to the conscience?

Keep Minard's in the Medicine chest.

Ramsay MacDonald May Meet President Hoover On Disarmament Question

London, England.—The possibility of a conference between Premier Ramsay MacDonald, of Great Britain, President Hoover, of the United States, and possibly Premier W. L. Mackenzie King, of Canada, was thrust into the forefront of political discussion from two different sources.

The London newspaper, Daily Herald, said Premier MacDonald, who is in London for personal consultation with President Hoover on Anglo-American relations, was willing to go to Washington for the purpose.

The Sunday Observer had editorially urged such a gathering at Washington, where the undefended frontier between Canada and the United States could be extended to the Atlantic ocean, as an undefended frontier between Britain and America.

Premier Mackenzie King and the Canadian government would play an important part in any such discussions, however, it was pointed out.

The Herald said the British cabinet would likely take the view that it would be essential that Canada be represented at such a meeting.

There is reason to believe, the newspaper says, that Mr. MacDonald, after view of the desirability of direct personal contact is shared by President Hoover and his advisers and that they will do everything to facilitate a meeting.

Cannot Return To Germany

Former Kaiser Is Barred From Returning For A Further Period

Berlin, Germany.—Former Kaiser Wilhelm's hope to return to Germany to spend his last days was postponed again when the Federal Council voted 62 to 1 in favor of a government bill requiring by this year the law for the protection of the republic, which would have expired soon.

The law permits the government to keep the former Kaiser under German guard as a menace to the safety of the state.

It was passed by the Reichstag in the summer of 1922 as an emergency measure, after the assassination of Walter Rathenau.

Sir Cedric Burney Dead

London, England.—Admiral Sir Cedric Burney, who topped a brilliant career in the British navy in 1926 with his promotion to the rank of admiral of the fleet, died at his home at Upton, Hants, June 6. He retired in 1925.

Passes Railway Bill

Ottawa, Ontario.—The Senate committee on railways recommended without amendment a measure to permit the Canadian National Railways to construct terminal facilities in Montreal at an estimated cost of \$5,400,000.

Fear Break Between China and Russia

Trouble Arising Over Arrest Of Soviet Officials In Manchuria

London, England.—Russian troops

were said by a Peking dispatch to the Macmillan front page to be massing on the Manchurian frontier, threatening a blockade of Chinese ports leaving Russian territory. The flight of the Chinese was in fear of arrest and deprivation of their belongings in retaliation for the arrest of Soviet officials in Manchuria.

Rengo news agency of Japan reported that Soviet consul general Kuznetsov, of Mukden, was under arrest at Haier and that intense anxiety was felt in the Harbin Soviet community where a complex break between Russia and China was feared.

The strained relations between the two countries began with Chinese hostilities against the Japanese invasion of Manchuria in 1900. The exchange of documents to support charges that Communists were actively interfering in Chinese internal affairs. The raids were followed by a sharp note of protest by the Soviet virtually suspending diplomatic immunity of Chinese officials in its territory.

Western Canada Air Mail

Negotiations With Various Airlines Companies Still Proceeding

Ottawa, Ont.—Negotiations between the post office department and the various airway companies of Western Canada in regard to the opening of airmail service over the 1,400 miles of mail route from Winnipeg west to Calgary and Edmonton and intermediate cities are still proceeding, but it is considered improbable that any contracts will be taken up until after the close of Parliament.

Officials of the department said recently that the problem presented by the desire of several companies to share in the contract appeared to be solved by the desire of several companies to share in the contract appeared to be solved by the desire of several companies to share in the contract appeared to be solved by the desire of several weeks ago.

To Be Presented At Court

London, England.—Thirteen Canadian sailors have been presented at Court June 8. They will be presented by Mrs. P. C. Larkin, wife of the Hon. P. C. Larkin, Canadian High Commissioner in London, include Mrs. J. H. Woods, Calgary, wife of the managing director of the Calgary Tread.

Value Of B.C. Fisheries

Ottawa.—Product of British Columbia fisheries in 1928 were worth \$26,562,601, an increase of 14 per cent over the previous year. Salmon now amounted to \$17,345,870; halibut, \$3,370,369 and pilchard \$2,562,137.

Debate On Comparative Advantages Of Foreign And Domestic Trade

Ottawa.—Trade and commerce estimates "buy from the countries which buy from us." That was the slogan when the Canadian members of a House of Commons committee of which James Malcolm, minister of trade and commerce, was under review. The debate covered a very wide field. It took in the new United States tariff, the opportunities of trade with the countries of South America and methods of advertising Canadian abroad.

The comparative advantages of a foreign trade and a domestic trade, based on a discussion with experts, led to an argument on the tariff. However, the estimates presented by Hon. James Malcolm, minister of trade and commerce, seemed fairly satisfactory to all parties, especially to all parties, except the Conservative party.

Mr. Bennett, Conservative leader, "have every evidence that when Canadian manufactured goods have found a market in the United States, that market has been sold to them by the Canadian tariff either by changing the classification or by a presidential proclamation under their elastic tariff provisions. That being equal, rather trade with Canada than with any other country."

Mr. Bennett said, "we must not time and effort should be expended to cultivate home markets and part of the trade with Canadian consumers would naturally made necessary the importation of \$1,396,900,000 worth of foreign goods."

The United States, he said, was not going to allow Canada to invade its markets. Canada should keep its own markets free from foreign competition.

Ramsay MacDonald To Lead

Accepts King's Invitation To Form a Cabinet

London, England.—Right Hon. Ramsay MacDonald, leader of the Labor party, accepted the King's invitation to form a Cabinet to replace that of Right Hon. Stanley Baldwin, Conservative prime minister, who resigned. Official announcement of the acceptance was made at Windsor Castle, where the King was ill, a few minutes after the Labor leader had called and gone to go back to London.

He arrived at 11:04 a.m. with his son, Mr. MacDonald and Lord Arnulf.

The King's usher, Colonel Seymour, escorted him inside the castle. He was received by the King more than an hour later at 12:15.

It was the second cabinet Mr. MacDonald has been called upon to form. The first was that of more than five years ago when the Labor party, with the help of the Liberals, was given its first chance at the control of the British government.

Roche Pinard, 18, of Montreal, Quebec, won the "Cup of the Nations" Among the Nations" won him the Canadian Oratorical contest at Toronto on May 22. Pinard will represent Canada at the international contest in Washington.

Forest Fires In Japan

Damage To Property Already Over Three Million

Tokio.—Heavy rains over the island of Saghalien and Yakkoku have greatly lessened the threat from forest fires that have been threatening since when the weather dries. Fire fighters are redoubling their efforts hoping to end the menace while the rain continues.

The governor-general of Saghalien reported losses on his island including 11,000 houses, 100,000 cattle and 1,200 houses destroyed, 4,710 men, and about \$3,250,000 damage to urban property. Damage to the forests had not been estimated.

Air Service To Stockholm

Incarnation Papers For Great Atlantic Airways Have Been Filed

Montreal.—A formal application to develop and maintain an airway service between the United States, Canadian and European airports, linking this city with Stockholm, Sweden, the Great Atlantic Airways has been filed.

The route would via Belle Isle Strait, Julianashand, Greenland; Ammanisland, Greenland; Bayvejk, Iceland; Thorshavn and the Faroe Islands and Oslo, Norway.

Incorporation papers have been filed with the State Department in August.

His Majesty's Condition Is Improving

Bulletin Issued By Physicians Shows Satisfactory Progress

Windsor, England.—King George suffered no ill effects from the excitement of receiving the outgoing and incoming Prime Ministers on successive days.

Medical physicians visited the monarch recently and issued a bulletin showing satisfactory progress.

Complete recovery probably will be slow, but an keen anxiety has passed from the royal household.

Test: Plane Damaged

Keyport, N.J.—The Burnelli monoplane which was to have been used in a ship-to-shore mail pick-up from the deck of the "Leyte" at sea was damaged in a ground test. The propeller struck an obstruction while taking off, damaging its new wing.

C.N.R. Earnings

Montreal.—Canadian National Railway gross earnings for the ten day period ending May 31, 1929, were \$7,540,000, as compared with \$7,545,000 for the corresponding period of 1928.

During the past five years, said Hon. R. B. Bennett, Conservative leader, "we have every evidence that when Canadian manufactured goods have found a market in the United States, that market has been sold to them by the Canadian tariff either by changing the classification or by a presidential proclamation under their elastic tariff provisions. That being equal, rather trade with Canada than with any other country."

Mr. Bennett said, "we must not waste time and effort should be expended to cultivate home markets and part of the trade with Canadian consumers would naturally make necessary the importation of \$1,396,900,000 worth of foreign goods."

The United States, he said, was not going to allow Canada to invade its markets. Canada should keep its own markets free from foreign competition.

The announcement by the minister that two new trade commissioners were being located in the United States brought the first official Conservative speech, indeed, that at the staff act of the United States became law, Canadian trade commissioners could bring more results almost anywhere else than stationed in that fruitful field for trade expansion.

WINS ORATORICAL CONTEST

Roche Pinard, 18, of Montreal, Quebec, won the "Cup of the Nations" Among the Nations" won him the Canadian Oratorical contest at Toronto on May 22. Pinard will represent Canada at the international contest in Washington.

Great Skill Is Shown By Ramsay MacDonald In Forming Cabinet

Discuss Tariff Question

Canadian Manufacturers Association To Make Pronouncement

Hartford, N.H.—The manufacturer who takes a strong position for what he produces and another on what he buys not only is inconsistent but he undermines the very position he seeks to safeguard. This was the opinion of Mr. W. V. Simons, a section chief of the Canadian Manufacturers Association, at which the report of the tariff committee was adopted by the president to draw up a pronouncement on tariff matters.

Canada's tariff problem was different from that of any other country, said H. M. Jackson, of Montreal. Our handiwork and agriculture entitled to special consideration in their marketing activities. Industrial trial development was essential. Any tariff policy must be shaped down to the goal of cheaper production and requires to the tariff committee should always be qualified to that end.

Going To South America

Type Of Immigration Now Running In Southwestern Direction

Edmonton, Alberta.—Immigration figures for the month of May show that immigration, which for decades flowed westward across the Atlantic to New York and other American ports, has definitely set in a southwesterly direction.

European shipping companies are creating larger and faster steamers to South America, than were the pre-war emigrant liners of the North Atlantic, with much better accommodations. Indeed, some companies have been holding up the Labor party's comparative lack of high legal talent. Mr. Jowitt was elected only last week as Liberal member in Preston, Lancashire, and he has a sea-green沁ipient filled with an implacable hatred of all those better than himself, is an idea which belongs to the land of dreams."

With a cabinet made up so much of men originally from trades of emigration, it is worth remembering that Mr. Snowden over, absolutely nothing to this great movement, which indeed rejected him when he was essayed an entry. Parliament has been haled with great approval as bolstering up the Labor party's comparative lack of high legal talent. Mr. Jowitt was elected only last week as Liberal member in Preston, Lancashire, and he has a sea-green沁ipient filled with an implacable hatred of all those better than himself, is an idea which belongs to the land of dreams."

To this end, added Mr. Jackson, the Canadian branch of Communism and is married to a woman who has incurred the undying hostility of the extreme left wing because of what she said in giving her impressions of Russia some years ago. Mrs. Snowden was a member of the Labor commission of enquiry to Russia in 1920.

Argentina has ordered all broadcasting stations to move outside the city limits.

Dr. Tory Makes Plea For Furtherance Of Research Work In Canada

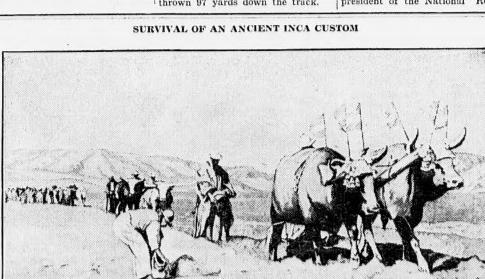

Halifax.—"Don't be content with second rate men, nor expect tremendous results in a year, but be confident in the future of scientific research in Canada. If you do this, you have nothing to fear for the future of the Dominion in industry or nationhood," said Dr. H. M. Tory, president of the National Research

Council, speaking before the Canadian Manufacturers Association on the work of the council and its investigations in Canada.

Outlining the unprecedented development of research into the scientific phases of industry in Britain, the United States and Canada, Dr. Tory told manufacturers here that Canada must take her place with the other nations of the world in the setting up of laboratories and the special training of scientists to man them. "But it is not enough," he said, "unless the manufacturers of Canada are alive to their opportunities and employ them. The idea is rapidly passing that we must take our ideas from other peoples. Too many of our Canadian men are engaged in building up the industrial life of foreign lands."

Speaking of the work that had already been done by the Institute of Canadian Science, Dr. Tory instanced the magnitude indicated in the three years of research had been placed in a position amply able to compete in the world market. During the past year 105 investigations had been carried on, the development of new resources and this work would be greatly extended in the new building, with the addition of students now being trained.

Work of Counterfeitors Is Now Engaging the Attention Of the League of Nations

It is not generally known that since the Armistice there has been a huge increase in the crime of counterfeiting, and amongst the lesser but practical endeavours which have engaged the attention of the League of Nations is that of attempting to minimize this international evil.

The extent of the menace is indicated by the results of an enquiry taken in 43 countries which shows that in a single year past less than \$100,000,000 counterfeit currency was seized by the police authorities while it was estimated that at least twice that amount remained in circulation.

In the war the number of currencies and the vagaries of the exchanges has afforded wide scope to counterfeiters who availed themselves of the differences between the penal legislation of their countries and the laws of neutral countries to whom their police authorities to prevent their trade and escape punishment.

This led the French government in 1927, to suggest that the master of currency be taken by the financial section of the League and substantial progress has been made in curtailing the operations of the counterfeiters.

The convention on this subject which met recently at Geneva obliges the signatory powers to prohibit the counterfeiting of foreign currencies just as severely as the counterfeiting of their own and contains extradition clauses to make sure that offenders are brought to justice.

At present no plan has suffered more from the operations of the counterfeiters and will follow with close interest the findings of the police, legal and financial experts who are dealing with the subject at Geneva.

Plague Killing Oak Trees

Famous Forest In England Is To Be Cut Down

Great Britain's largest oak forest, the Royal Forest of Dean, which was planted to provide timber for the British Navy in helping to defend the like Sherwood Forest, which is gradually disappearing to make room for colliery developments, Dean is suffering from the plague of disease. Millions of acres of trees are being attacked by a mysterious ailment, and are going prematurely to decay. Their branches are shriveling up and dying, and their trunks are becoming irregular and warped and warped. The forest, in some parts, is intact, but over a large area in the centre the decaying boughs and stunted trees make a picture of the giant of the forest has sapped its vitality.

The exact cause of the forest plague cannot be determined, although experts have made frequent investigations. The investigation, however, has ascertained that the chief cause of the rot is an unknown fungo entering the lower dead or dying branches of the trees. One theory is that hares are doing the damage, but the experts have not yet found any evidence of the workings of mites under the forest.

Egg Laying Contest

Birds' Rocks lead for both initial and weekly prizes in the Manitoba egg laying contest at the experimental farm, at Brandon. The pen owned by John G. Scott, of Minto, leads for total production with a record of 1,586.7 points and 1,436 eggs, and the pen owned by T. E. Horne, of Minto, leading for weekly production with a score of 71.3 points and 63 eggs.

Mistress: And when you leave shall want plenty of warning.

Servant: It's my high, mammy, merely to give a nod with my wavy horn.

Religion in Russia

Soviets Learning Nature Of People Cannot Be Changed By Law

The Russian Soviet government has abandoned so many of the things it stood for when it came into being that it would not be surprising to receive confirmation of the report that it is about to abandon its official opposition to all religion.

According to dispatches from Moscow, an amendment to the constitution is to be introduced forbidding any restrictions on religious practices. The soviet is not to abandon passive objection to religion but it is to abandon its active efforts at suppression.

It will decree separation of church and state, but it will grant its people the right to such religious practices as they choose to adopt. In other words, it will cease to persecute its people on religious grounds.

The Russian people are essentially religious in their nature. They have an abiding faith, which though it has been rough ridged by their rulers, has not been eradicated. Religious observance is still strong in the country, and especially in the rural areas. Under the rule of the soviet, its outward manifestations have been disrupted, but the spirit among the masses has been undisturbed.

Sovietism is learning the true nature of a people which can not be changed by law and edict. That which has been held by centuries of habit and cultivation can not be destroyed in an instant. The cheapness and strength of the cheap and simple life of the people is the product of long development. That which has been created through such a period is part of the foundation that reaches deep into the spirit.

Good Openings Here For Danish Farmers

Great Opportunity For Workers Danish Advisor Tells C.N.R. Officers

"We are pleased to know that Danish agriculture is acceptable to Canada, and I can see that there is great opportunity for them in agriculture here, provided they are ready to work," stated Chr. Christensen, government advisor in agriculture for the Canadian National Railway, while on his way home after escorting a party of Danish settlers to Winnipeg, where they were located under the auspices of the Colonization Department of the Canadian National Railways.

While in Canada Mr. Christensen took the opportunity of studying the junior farmer movement, and the work of the boys' and girls' clubs, which has proved immensely successful in Canada in raising the quality of livestock produced on the farms.

"With the same amount of work he would have to put into an ordinary farm holding in Denmark, a Danish farmer should be able to become very prosperous on the extremely fertile Canadian soil," said Mr. Christensen, discussing with C.N.R. officials the matter of Danish settlement in Canada. "It takes a good deal of money to go into a farm property in our country."

The cheap farmlands, and the possibility of operating a great deal more land to better advantage with the same effort, is a great attraction for our Danish friends. We do not know if any of our people to come here, however, who are not willing to go into farm work."

Mutual Encouragement

Men At Work Better Under Influence Of Kindness

Men grow better, hard times and harsh discipline, whether of men or circumstances, may test and toughen endurance and stiffen courage, but men grow better under kindness, friendlier better in the warmth of good will and kindness. These are the spring tonic of human life, which can awaken all its hidden power and riches. We grow better, work better, and live longer under the influence of the habit of mutual encouragement and the widespread warmth of genuine good will.—Philadelphia Ledger.

Best Effort

A small boy was told that he must write to his grandmother a letter of sympathy on the death of her husband.

This is the letter, adorned with many blots, that eventually arrived: "Dear Grandmother, I am very sorry poor Grandpa! Please send me some stamps. There is a new boy here who squeaks if I hit him. With love, from Roger."

Traffic Drugs

Several drugs are currently rising in Toronto through the mails, according to Crown Attorney W. K. Murphy, who decided in police court that it was only necessary to telephone a certain number in Detroit to secure delivery by mail in a little red bag, of illicit dope.

DISTINCTIVE CHARM

One-piece sleeveless sports dress with crepe. Two surfaces of crepe satin, georgette crepe, canton-faille and printed paper are also appropriate. The straight collar and trimming look well in white or light colors. Silk crepe Style No. 834 is designed in sizes 16, 18, 20 years, 36 38, 40, 42 inches. Price 25 cents per yard. 36-inch size 2½ yards of 36-inch material with ½ yard of 32-inch contrasting material in stripes or even crepe preferred.

Paris and New York Styles attract. Many colors are available and for the use if home sewers, fill our new summer Fashion Magazine just issued. Price 15 cents a copy, but only 10 cent if ordered same time as a pattern.

Best Recipe For Longevity

Building Up Bodily Resistance To Disease Says Famous Surgeon

Dr. William Mayo, world famous surgeon with Charles, gave \$2,000 to University of Manitoba for medical research, says longevity is largely a matter of building up body resistance.

Today we are living longer than ever before, 50 years ago a man's life was 30 years. This has been extended until now it is fifty-eight. Today science is concentrating to increase the resistance powers of human beings and thereby combat those diseases like cancer and tuberculosis like span of 100 is a possibility.

Discussing probability, Dr. Mayo believes it is almost impossible to increase the human race.

From the standpoint of public health, abstinence from liquor would prove beneficial," he said. He referred to Vienna, where since the advent of pure water and drinking water, the death rate of children has dropped 40 per cent, in ten years.

"Pure water always has, and always will be the greatest healer for human beings," says the surgeon.

Shortage Of Spoons

Doctor: "Give your husband five spoons of this mixture every evening before going to bed."

Wife of Patient: "I can't do that, doctor."

Doctor: "Nonsense."

Wife: "We only have three spoons."

"You wife's a mould, isn't she?"

"I'm not certain. She's at the beauty parlor this afternoon."

Ancient Traveller

This strange-looking animal is a Duck-billed Platypus. It originated in Australia and is thought to be the only specimen of its kind in Canada. Its body is eighteen inches long and its head and feet, the latter being flat and webbed, greatly resemble those of a duck. It has the tail of a beaver. Canadian Pacific Express officials had no problem of feeding it as it has been stuffed for over a hundred years.

International Ice Patrols

Searching For Icebergs In Broad Sweep of North Atlantic

New Canadians To The Fore

Difficulties Of Assimilation Of the Foreigners Seems To be Exaggerated

The high school of the Calgarie recently engaged in the preliminary examination for the Canadian citizenship certificate. Of the 2,000 candidates in the city only one was born in Canada, one in England, one in Lithuania, one in Romania, and one Russia.

Of course five, four were immigrants still young enough to be in high school, yet each born in a different country. All come together in competition to see which could best speak, in English if realized, to an established status. It is more than probable that they spoke more freely on the subject relating to the welfare of this land in which they now live.

We hear a great deal of the drifts of assimilation. We produce our pessimists who spend their time in gloom and despair against the bringing in of the foreigners. To often we tend to overlook the other side, and forget that there are many influences incessantly at work tending to make Canadians of these new comers.

On the first day of April each year this ice-belt begins, and continues night and day until the close of June—three months of strenuous, perils and unceasing labor, such as we have never seen on the face of the waters known.

With the coming spring, winter relaxed her grasp on the regions near the Polar bergs, and even fields of ice are away from the coast, and with the change of temperature and are swept southward by currents from Labrador and Greenland, in many cases crossing the routes of trans-Atlantic traffic.

It requires little imagination to realize the menace of such colossal fotsam of the sea to vessels across whose path they are swept; for many of them were built of iron and though only a portion of their bulk is visible above the surface of the sea. No lights or sirens reveal their presence. In the darkness of night scarcely even a passing ship can be seen before the doomed vessel crashes into them to her destruction.

Having encountered one of these floating icebergs its exact position is marked on the chart and a wireless message sent out calling to the garing of warning of its locality. The patrol ship then stands by the towering peak of ice, observing its speed, the direction of its travelling, its size, and so on, and carries with it a boat and a crew, and a warning to ships likely to cross its path.

Some bergs will travel as much as 30 miles in 24 hours; others only cover five or six miles. A berg, heading due south, may be caught in a cross-current and end up in the north, or back to the north, and thus it is often necessary to keep it chitily company for days until perhaps it is swept away again to safety. Occasionaly the current is made on berg or field and a move detected and accurate examination made of it than is possible from a ship.

Experiment With Fur Animals

Russian Sable and Stone Marten From Ontario Government

A pair of Russian sable and a pair of stone martens have been brought from Europe by the Ontario Department of Game and Fisheries, and are to be used in the scientific fur breeding station at Kitchener, Ont. The animals were brought out to determine whether they can be raised in sufficient numbers in Ontario to benefit the fur trade. The animals were accompanied on the journey to Canada by 250 skins of various kinds whose breeds will be used for restocking purposes in suitable locations in the province.

Better Than Gasoline

There is a story to the effect that to talk about, if only we could turn our attention to them. Books for instance, what fruitful time friends can have talking over the books that they have been reading! Music and art are good, too, but the best of all is conversation.

If much of it would resolve to lift his talk a little, the level of gossip would rise and everybody would be better off.

Creating Seed Cleaning Plants

The Dominion Government will erect and equip a modern seed cleaning plant at Moose Jaw, at a cost of \$150,000, and jointly finance with the Provincial Government up to \$1,500 per unit the establishing of seed cleaning plants under the auspices of municipalities or agricultural societies.

Need Temperature Change

It is now held that chronic nerve disease is caused by a lack of change in temperature conditions from season to season, and disappear when the patient migrates to higher elevations or where there is a well-defined range of weather conditions.

Hunting for icebergs has been a regular business on the Atlantic ocean for three months in the year since the spasm of horror passed through the world in April, 1912, when the news came that the glacial bergs had crashed into an iceberg and was lost, with most of her passengers and crew. It was this terrible catastrophe that gave birth to what is known as the International Ice Patrol, whose duty it is to protect all who cross the Atlantic from a similar calamity as far as possible.

The cost of this patrol is shared by several European nations, including England, France, Italy, the United States, but the patrol itself is the United States Coast Service, and its duty is to protect the seas from the Grand Banks to the Arctic, and search of missing persons.

On the first day of April each year this ice-belt begins, and continues night and day until the close of June—three months of strenuous, perils and unceasing labor, such as we have never seen on the face of the waters known.

With the coming spring, winter relaxed her grasp on the regions near the Polar bergs, and even fields of ice are away from the coast,

and with the change of temperature and are swept southward by currents from Labrador and Greenland, in many cases crossing the routes of trans-Atlantic traffic.

It requires little imagination to realize the menace of such colossal fotsam of the sea to vessels across whose path they are swept; for many of them were built of iron and though only a portion of their bulk is visible above the surface of the sea. No lights or sirens reveal their presence. In the darkness of night scarcely even a passing ship can be seen before the doomed vessel crashes into them to her destruction.

Having encountered one of these floating icebergs its exact position is marked on the chart and a wireless message sent out calling to the garing of warning of its locality. The patrol ship then stands by the towering peak of ice, observing its speed, the direction of its travelling, its size, and so on, and carries with it a boat and a crew, and a warning to ships likely to cross its path.

WORLD HAPPENINGS BRIEFLY TOLD

The question of the eligibility of soldiers to vote in elections to the Senate of Canada is expected to be considered by the Judicial Committee of the Privy Council shortly.

The United States has communicated to the League of Nations its agreement with Canada concerning racial equality in public experimental stations.

Dr. Hugo Eckener, director of the Zeppelin Company, emphatically denied that the trans-Atlantic dirigible Graf Zeppelin had been sold or that he was negotiating for its sale in the United States.

The treaty between Canada and the United States designed to conserve the sockeye salmon fisheries of the Fraser River, will not be ratified by the Canadian parliament this session.

Fatally stricken by a wire cable which snapped under a heavy load, Mike Blazekoff, is dead at The Pas. The cable being wound in the process of loading a gravel train bounded Blazekoff to his death.

Spanish influenza, British ambassador to Portugal, died in a London sanatorium following an operation. He was counselor to the embassy at Washington in 1913, and minister plenipotentiary to Washington in 1917.

Twenty-five British boys coming out under the auspices of the department of agriculture of the Saskatchewan Government, were among the 374 passengers from the "Andania" who arrived at Vancouver over Canadian National recently.

A slim line of railway steel from Cranberry Portage, jutting along toward Cold Lake, begins to stretch farther into the rich mining land of Manitoba's north. Work has just begun on the Cold Lake branch, but the line is expected to be operating by September.

IS THERE A BABY IN YOUR HOME?

Is there a baby young children in your home? If there is you should not be without a box of Baby's Own Tablets. Children ailments come on suddenly and must be met at hand to promptly fight them. Baby's Own Tablets are the ideal home remedy. They are made from bowls; sweeten the stomach; banish constipation and indigestion; break up catarrh; help to stop diarrhea; they relieve all the minor ills of little ones. Concerning them Mrs. Moses Gallo, of New York, writes: "Baby's Own Tablets are the best remedy in the world for little ones. My son, who is now 10 years old, has digestion and vomiting, but the Tablets soon set her right and now she is in perfect health." Send for sample by medicine dealers or by mail at 25 cents a box from The Dr. W.H. Williams' Medicine Co., Brooklyn, Ont.

BREAD 36 Years Old

A small loaf of bread, said to have been baked Good Friday, March 22, 1853, is on exhibition here. It is owned by Mr. John Bartlett, aged 80, and was baked by his mother, Mrs. Bartlett says a legend that a loaf baked on Good Friday will endure forever prompted its making and its preservation for 75 years.

A safe and sure medicine for a child troubled with worms is Mother Grapes Worm Exterminator.

Two complaints were taken:

"You know," said one, "I took John Bunyan all his life to write a story."

"Garn," was the reply, "it took me ten years to do a sentence."

A Strange People

Russian Exploration Party Makes Interesting Discovery In Siberia

Discovery of a strange race of people who make a habit of smoking from the cradle to the grave, and live on a steady diet of animal fat during their lifetime, to keep themselves warm is reported by a Russian exploration party.

Known as the Udehe tribe, these people inhabit the vast virgin woodlands of eastern Siberia. They live in crude dwellings built of branches of trees and bark, and we use leaves and skins as covering.

According to the Russian explorers the total number of the tribe is not more than 1,500, and they have no means of recording events, the history of their origin cannot be learned, but it is presumed that they were driven off of Manchuria and Mongolia centuries ago.

Keep Your Baby Well and Strong

A baby's health and development depends largely upon the care and food it receives. You can't bathe daily and fed regularly. If you cannot nurse your baby try Eagle Brand Milk.

The foremost infant food—made from rich cow's milk and carefully prepared for babies. Recommended by physicians everywhere on account of its quality and uniformity.

In this paper from time to time you will find an advertisement of Eagle Brand Milk, a food that has won the confidence of mothers and the prepared infant foods combined. Cut out the advertisement and mail it to The Borden Company, Limited, 1 St. Paul St. West, Montreal and they will send you a copy of their valuable book, "Bathing and Feeding a healthy baby," written by a leading authority feeding directions and a vast amount of useful information on the care of baby. Also ask for Baby Record, a diary of baby's progress.

SHRIMP STEAK JULIENNE

Our shrimp steaks, which is about one square inch thick and three inches square. Roll in flour, brown both sides lightly in frying pan. Place browned squares in baking dish, season with salt and pepper and cover with tomato sauce. Bake in well-greased muffin tins for thirty minutes. (Will make 32 muffins.)

TOUGH? Say - They hold all, world records.

Firestone TIRES

The Desert Song

BY

VIRGINIA MORRIS

Courtesy J. C. Warner Bros. Pictures, Inc.
"The Desert Song" is a Warner Bros. Picture presentation of this novel. It's based upon the best-seller by Louis Untermeyer, "The Desert Song," which was written by the author of "The Big Tree." It's directed by George W. Hill, and stars Paul Muni, Greta Garbo, and Alan Hale.

CHAPTER IV.

Margot Bonvallet was alone. It was late afternoon and she had just given General Brirabeau her answer. General Brirabeau had been waiting for her that night. She was allowing herself a few last moments of meditation. Leaning against a tremendous mosquito archway, she stood on the balcony and gazed at the vast desert. It was dark now, and the moon had begun to rise. The heat was still intense, though, the ache for an insatiable something that would never be fulfilled. This was not the wedding day of which she dreamed.

Her reverie was broken as a man's steps sounded on the balcony behind her. She turned to see that the stranger was clad in a burmose of flaming scarlet and his face was hidden behind a protecting mask.

"The young Red Shadow," she murmured to herself. "She had recovered her breath and had steadied herself against a chair. He bowed gallantly. "A vote service, Mademoiselle?"

Margot's indignation at the sight she did not feel. "How dare you come here?" she demanded.

"I heard you call for romance," her visitor explained. "I, too, long for romance and I would dare anything to get what I want. But what would you dare, that's what I came to find out."

The girl ignored the question which the Red Shadow had asked with gusto.

"Once more, I am sorry from the bottom of my heart that you would wipe out the Red Shadow?" she asked him.

The mysterious stranger shrugged his shoulders. "You wouldn't call for romance in one breath and toss it away in the next?"

The ardor of his voice grew as he leaned toward her. "Will you come with me?" he begged. "If you come, I promise not to hold you, but you will come."

Margot, pale and breathless, clutching her riding crop to give her confidence. Now she raised it quickly. With it she struck the man before her straight across his face. He buried his head in his arm to alleviate the pain and reeled again the balcony rail.

But the girl's indignation quickly cooled. She was alarmed at what she had done. "Oh, I've blinded you," she cried, running over to him. But the Red Shadow had by now recovered himself.

"No, Margot, you haven't blinded me, you just opened my eyes. Now I'm going to make you love me again."

Before she could protest, she felt his arms around her, felt his body against his own, felt his mouth seek hers. For a wonderful moment she yielded to the remembrance of the promise by Paul restored her to her senses and she drew herself away from him.

"General Brirabeau!" Paul! Paul!

With a nimble leap, the Red Shadow leaped the balcony once again, and through the outlaw's visit, of his presumptuous advances General Brirabeau was inclined not to believe her. He thought that the episode was an invention of the girl's feverish imagination, induced perhaps by her successive disappointments with Paul. She found a sympathetic listener when Pierre came in a little later.

"What did he look like?" he asked.

"He was all dressed in red, Pierre. His complexion is no darker than yours. He was masked, but his eyes seem to gleam through. He's a big man—about a head taller than you—and he has a very strong voice."

At this juncture Captain Fontaine, who had heard the report of the Red Shadow's visit, came hurriedly in. He could not understand how the leader of the Riffs had gained access to the house for every end he had in view was carefully guarded by traps.

However, he considered the man's audacity in coming a personal challenge to him and determined to run him down at once.

Already the signal fire was lit on the darkening horizon.

The Riffs were calling their leaders and he would answer them as always.

While he waited, he prepared to leave. Margot was both disappointed and annoyed. After all, he was as she had known him to be, her lover only when the bugle did not summon him to military adventure. With the men of the Red Shadow now upon him, forgotten.

He would lead a cavalry troop into the desert at once to kill the Red Shadow, for he realized that the natives loved this man and might revolt if he were taken prisoner.

Again alone, Margot waited—she knew not for what. A sudden volley of shots in the courtyard told her that the Riffs and the French were in action combat.

The outlaws had come to make a garrison itself. She felt the tiny revolver in her pocket and was about to seek an even surer safety when

the Red Shadow entered the room once more as mysteriously as before. She slipped the gun and leveled it at him.

"Come a step nearer and I'll fire!" For a moment he said nothing but only looked at her very steadily. When he noticed that she wavered, he whispered softly. "Put down that gun."

Quickly she raised it to take aim, but more quickly still he caught her wrist and pinned it until the weapon was useless. Then he began to make further protest; he had picked up his arms. In vain she fought to free herself. In vain she called for help. There was none to aid her, for every soldier in the garrison was holding firmly to keep off the attacking Riffs.

Outside, his white horse waited for him. In an instant he had thrown the girl across the saddle and had mounted. The pony galloped forward, far into the land into the mystery of the desert night, into the vast unknown where romance and love are found. Margot Bonvallet no longer sought her. She clung to the saddle, her heart thumping, and spurred his horse on to a greater speed, and the world she had known was left far behind.

CHAPTER V.

The Red Shadow did not take his beautiful hostage to the Riffs' encampment in the hills. Instead, he carried his guest to the oasis in the salt flat, the salt flat of which towered the magnificent palace of Ali Ben Ali. Riding close at his heels came twenty of his own men who had been with him since he became master of the Riffs.

Upon arrival to the oasis, the Red Shadow immediately began to look after her employer's cows. Miss Peggy Bullion, a member of Women's Farm and Garden Association, is hard at work clearing 367 acres of forest land, 8,000 feet high, at Molo, near the town of Lengnagrak, in the help of only half a dozen boys.

She writes that it is a slow job, as there is no dormant season and weeds grow all the time, but she has now cleared, uprooted, freed, and piled about 100,000 cubic feet of brush.

Since the war land women have had wonderful success as timber breakers, dairymaids, and stock-women, and the demand for them steadily continues.

Farming Near the Equator

Girl in South Africa Turns Forest Into Farm Land

A land girl of Kenya, Colony, Africa, is turning a forest into a dairy farm.

Ali Ben Ali, riding close at his heels, came twenty of his own men who had been with him since he became master of the Riffs.

Upon arrival to the oasis, the Red Shadow immediately began to look after her employer's cows. Miss Peggy Bullion, a member of Women's Farm and Garden Association, is hard at work clearing 367 acres of forest land, 8,000 feet high, at Molo, near the town of Lengnagrak, in the help of only half a dozen boys.

She writes that it is a slow job, as there is no dormant season and weeds grow all the time, but she has now cleared, uprooted, freed, and piled about 100,000 cubic feet of brush.

Since the war land women have had wonderful success as timber breakers, dairymaids, and stock-women, and the demand for them steadily continues.

Large Numbers Of Repatriates Return

1,000 Canadians Returning To Canada From United States

During 1929, about two thousand repatriates returned to Canada from the New England States to take up farming in Quebec; Ontario and the far west of Canada, according to estimates of the Colonization Department of the Canadian National Government. The movement of immigrants in which the Canadian National was directly interested, 1,500 Canadians, most of them natives of Quebec, returned to Canada to go on the land.

The Red Shadow reciprocated this gesture of goodwill.

"Once more, Ali, be thy good self and share mine," he said.

"Please, sir, I protect the protector of my race? What is it this time? Have you burned down a prison or kidnapped a tax collector?"

"This time, it's a little different," admitted his visitor with a smile.

"Yes, yes, to be sure you bring two women captives—that is unusual. Many times I have offered you the hospitality of my home but you have always turned me down as shy about women as—as a Christ."

The Red Shadow bowed very low before her. Shekli All Ben Ali ventured a suggestion with a smile.

"Yes, yes, to be sure you bring two women captives—that is unusual. Many times I have offered you the hospitality of my home but you have always turned me down as shy about women as—as a Christ."

From the Garden, Sid El Car entered with soldiers guiding Margot and Susan. Both of them were blindfolded but the Red Shadow immediately ordered the bandages removed from their eyes.

"Where's my Bennie?" demanded Susan, querulously.

Margot, still tugging at the ropes that bound her hands, cried "Where's that brute—that outlaw—that kidnapper?"

The Red Shadow bowed very low before her. Shekli All Ben Ali ventured a suggestion with a smile.

"Yes, yes, to be sure you bring two women captives—that is unusual. Many times I have offered you the hospitality of my home but you have always turned me down as shy about women as—as a Christ."

The Red Shadow bowed; "By all means, bring her."

"How dare you?" protested Margot. "As a French citizen, in the name of the republic of France, I demand to be released!"

Firmly but quietly, the slaves led the captured girls to the leader of the Riffs. "I presume you want them to get the same treatment as my women here—you want them bathed?"

The Red Shadow nodded; "By all means, bring her."

"How dare you?" protested Margot. "As a French citizen, in the name of the republic of France, I demand to be released!"

Firmly but quietly, the slaves led the captured girls to the leader of the Riffs. "I presume you want them to get the same treatment as my women here—you want them bathed?"

The Red Shadow bowed; "By all means, bring her."

"How dare you?" protested Margot. "As a French citizen, in the name of the republic of France, I demand to be released!"

Firmly but quietly, the slaves led the captured girls to the leader of the Riffs. "I presume you want them to get the same treatment as my women here—you want them bathed?"

"Oh, Bennie!" squealed Susan, "he's taking me upstairs. But somehow, Bennie made no movement of protest."

(To Be Continued.)

Beats the Sun

The 2,000,000 candle-power "Lindberg Light" which Elmer Sperry is giving Chicago and the Midwest as a present to the city is brighter than the sun. It is more than twice as bright as the sun.

Don't miss "The Patsy", this
week at the Empress Theatre.
A comedy drama of the re-
volt of Pa—the subjugation of
Ma and the victory of Sis.

Mr. Lach is entertaining
two of his sisters who arrived
here by auto, Wednesday.

Mrs. Don MacRae is enter-
taining her sister, Mrs. Hicks,
of Saginaw, Mich., U.S.A.

A large number of our town
people attended the picnic at
Acadia Valley, July 1st.

The Castle Combe W. M. S.
will meet at the home of Mrs.
John Rowles, on Wednesday,
July 10, at 2 p.m.

Dr. A. L. Caldwell, of Cabri,
Sask., arrived on Thursday of
last week to spend a week visit-
ing his home and renewing ac-
quaintances—Budget, Loverna.

C. Cremon, local harness
maker and shoe repairer, has
erected an addition on to the
rear of his store building.

Miss Edith Rowles arrived
home on Saturday, and left
again on Tuesday morning's
train from Alaska to attend
summer school at Saskatoon.

Miss Betty Dutt is home for
her vacation during school
holidays. Mr. H. J. Dutt of
Hanna, spent a few days here
with his family.

A. D. Bierwagen, school prin-
cipal, J. Maxwell and Miss B.
Maxwell, teachers, left on Sat-
urday morning's west pas-
senger train, for their summer
vacations.

The Anglican open air church
services held at Loupene's Ferry,
near Prebute, drew a large con-
gregation, about two to three
hundred people being present.

Miss Mildred Hutchinson ar-
rived home last week from
Calgary, where she has been
attending normal school.

Mr. and Mrs. Wm. Pullen left
this morning, by car, for an
holiday trip of two or three
weeks duration.

Miss Peggy Arthur arrived
home this week from Calgary,
where she had been attending
school.

Importance of the
Late Spray of Apples

Not infrequently letters are
received at the Central Experi-
mental Farm from growers
complaining that although they
have sprayed their trees, their
fruit during that particular
year has been badly affected
with apple scab. Upon close
inquiry it is generally ascertained
that only the first two or
three sprays have been given
and that late infestations of ap-
ple scab have caused the trou-
ble.

There is no set number of
sprays required, no rule of
thumb method whereby econ-
omic control can be guaranteed.
Some years the late sprays are
all important, while during
others the reverse is the case.

The calyx spray which goes
on before the calyx closes is
generally the third spray and
in some seasons may have to be
followed by at least two more.
To obtain control of apple scab
it is necessary to practically
keep the foliage and young
fruit covered with a good fung-
icidal spray. Only by doing so
can the fruit be safeguarded
against late infection.

Very frequently fruit is kept
clean until late August and then
on account of a few days of
close muggy weather sufficient
seab appears on the fruit to
